(c) and (d) Imports during the first three quarters i.e, April-December, 2004-05 are valued at US$ 73.65 billion respresenting an increase of 33.64% over the corresponding period of previous year. The main reasons for increase in imports are the sharp increase in crude oil prices and gold prices in the world market and increase in demand of inputs for

manufacturing sector which registered a significant increase during this period.

(e) There are no measures to restrict imports or artificially balance trade that may led to dampening of the growth of the economy or lead to resurgence of inflationary pressures.
